EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Deborah Gladstein on 19 November 2003. The application has been amended as follows:
Claim 12 is hereby cancelled.

2. The following is an examiner's statement of reasons for allowance: The claimed device is a SRAM with NMOS and PMOS devices which are formed in wells with trenches between devices with specific depth limitations for different regions. Hu et al. show DTMOS and CMOS devices with wells and isolation trenches but the trenches are deeper than the n-well and thus the claimed invention is not shown in the prior art.

IDS

3. Applicant's IDS, received 5 August 2003 contained 10 references with 8 being included on the 1449. The two other references had no translation and were not included on the 1449 and were therefore not considered. Applicant's second supplemental IDS dated 18 August 2003 pointed out a purported error in the prior IDS but the import of this is not understood.

Conclusion

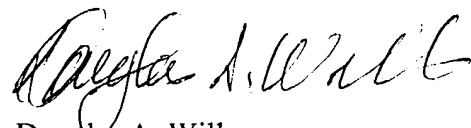

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
